DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372:

Group I, claim(s) 1-6, drawn to a method of partitioning a program into blocks of code, and optimizing said program by reordering the blocks of code, classified in class 717, subclass 159.

Group II, claim(s) 7-9, drawn to a method of calculating up-safety and down-safety for use in eliminating partial redundancy from a program, classified in class 717, subclass 156.

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as optimizing a program by partitioning said program into blocks, and reordering the blocks to eliminate partial redundancy.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/552,292

Art Unit: 2122

5. A telephone call was made to John Ward on Tuesday, September 24th, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth A Gross whose telephone number is (703) 305-0542. The examiner can normally be reached on Mon-Fri 7:30-5.
